

MALITH DESHAN RANAWEERA

Associate Software Engineer

malithranaweera@gmail.com | malithranaweera@hotmail.com

PROFESSIONAL PROFILE

Associate Software Engineer holding a BSc (Hons) in Software Engineering and an MSc in Information Technology, both from Cardiff Metropolitan University, UK. An enthusiastic and dedicated professional with over five years of hands-on experience delivering full-stack business systems in the insurance sector, spanning requirements analysis, backend and frontend development, database engineering, and API integration. Committed to continuous learning and consistently seeks opportunities to take on additional responsibility in pursuit of professional growth.

PERSONAL INFORMATION

Gender: Male **Nationality:** Sri Lankan

PROFESSIONAL EXPERIENCE

Associate Software Engineer (Full stack) | *Ceylinco General Insurance PLC, Colombo 01* – January 2022 – Present

- Develop user-friendly interfaces and robust server-side logic using PHP and ASP.NET.
- Handle backend development tasks to ensure reliable, high-performing system functionality.
- Create and maintain Crystal Reports for comprehensive data reporting.
- Ensure high-performance database operations through Oracle Database and PL/SQL.
- Collaborate within cross-functional teams for seamless, API-driven data exchange.
- Conduct comprehensive testing, bug identification, and active participation in code reviews.

KEY PROJECTS

Miscellaneous Payment Processing System | *Ceylinco General Insurance PLC* – 2026

- Developed a multi-level payment approval system where assessors submit bills that are reviewed by Area Engineers, with escalation to AGM or Director-level approval where required.
- Enabled final authorisation by the Accounts Department, with automatic generation of temporary payment vouchers upon approval.
- Built using PHP and Oracle Database to streamline the end-to-end payment approval workflow.

Seylan Fund Transfer System | *Ceylinco General Insurance PLC* – 2025

- Developed a web-based fund transfer system for processing insurance claim payments through Seylan Bank, supporting both Seylan-to-Seylan and Seylan-to-other-bank transfers.
- Integrated secure bank APIs to automate transfer initiation and confirmation, improving payment turnaround time.
- Built using PHP and Oracle Database to ensure reliable, traceable claim disbursements.

Task Management System | *Ceylinco General Insurance PLC* – 2024

- Developed a Task Management System to replace the manual, email-based process for handling Oracle form issues and error reports.
- Enabled branches to submit reports directly through the system, with the head office able to view error descriptions, attachments, and status updates in real time.
- Streamlined issue tracking and resolution, allowing the head office to record actions taken and reply with attachments as needed.

Dividend Warrant System | *Ceylinco General Insurance PLC – 2023*

- Developed a comprehensive Dividend Warrant System covering the complete dividend distribution process, including digital warrant generation, automated shareholder mailing, and cheque printing.
- Evolved the system from an initial bulk PDF-based warrant generator into a full end-to-end digital and physical disbursement solution.
- Reduced manual processing effort and improved accuracy and turnaround time for shareholder dividend payments.

Employee Management System | *Ceylinco General Insurance PLC – 2022*

- Led development of an Employee Management System using PHP and Oracle Database for the Company Secretary Department.
- Designed an intuitive interface for managing designations, branches, and employee records, backed by secure server-side logic.
- Built custom Crystal Reports to improve reporting efficiency across the department.

Automated Finance System | *ANC Educations – 2022*

- Designed and implemented a web-based Finance System for the university's Education Department.
- Automated PDF generation for invoices, receipts, settlements, and statements.
- Implemented a cron job system for scheduled tasks and automatic email notifications to students upon payment.

EDUCATION

MSc in Information Technology | *Cardiff Metropolitan University, United Kingdom – 2024 – 2026*

- Completed with an overall Merit grade.

BSc (Hons) in Software Engineering | *Cardiff Metropolitan University, United Kingdom – 2019 – 2021*

- Completed with 2nd Class Upper Division (2.1).

Diploma in Web Engineering | *Pearson, United Kingdom – 2019*

- Conducted by ESOF Metro Campus, Sri Lanka.

Diploma in Software Engineering | *Pearson, United Kingdom – 2019*

- Conducted by ESOF Metro Campus, Sri Lanka.

Higher National Diploma in Software Engineering and Computing | *Cardiff Metropolitan University, United Kingdom – 2016 – 2019*

- Conducted by the International College of Business and Technology (ICBT), Sri Lanka.

Higher Diploma in Software Engineering and Computing | *Cardiff Metropolitan University, United Kingdom – 2016 – 2019*

- Conducted by the International College of Business and Technology (ICBT), Sri Lanka.

Foundation Program | *International College of Business and Technology (ICBT), Colombo – 2016*

- Followed the Foundation Program in place of GCE A/Level and completed with a Distinction.

G.C.E. Advanced Level | *St. John's College, Panadura – 2014 – 2016*

G.C.E. Ordinary Level | *Holy Cross College, Kalutara – 2014*

- Results: 1 A, 4 B, 4 C passes (IT – A, English – B, Science and Mathematics – C).

ACADEMIC FINAL PROJECTS

Design and Implementation of a Secure Web-Based Voting System Using PHP and MySQL | *MSc Final Year Research Project (Individual) – 2026*

- Analysed existing online voting systems to identify security vulnerabilities in authentication, data integrity, privacy, and transparency.
- Designed and implemented a secure voting platform using PHP and MySQL, incorporating email-based OTP authentication, AES-256-CBC vote encryption, and safeguards against common web vulnerabilities.
- Developed a role-based administrative dashboard and SHA-256 chained audit logging to strengthen transparency and election verification.
- Evaluated the system through usability testing, security testing, and performance assessment.

Royal University Student Management System with Student Result Prediction | *BSc Final Year Research Project (Individual) – 2020*

- Carried out requirement gathering, system analysis, design, implementation, and testing.
- Implemented using PHP, HTML, CSS, and JavaScript, with Bootstrap and jQuery libraries and a MySQL database.
- Achieved a Distinction grade.

Royal Paradise Hotel Management and Reservation System | *HND Final Year Project (Group of 6) – 2019*

- Contributed to user interface design and system development, using PHP as the backend language.

TECHNICAL SKILLS

Languages: PHP, Java, C#

Web Technologies: ASP.NET, HTML, CSS, Bootstrap

Databases: MySQL, SQL Server, Oracle / PL-SQL

Concepts: Object-Oriented Programming, Structured Programming

Tools: Dreamweaver, NetBeans, Visual Studio, Visual Studio Code, Android Studio, SQL Navigator

PROFESSIONAL MEMBERSHIPS

Computer Society of Sri Lanka (CSSL) | *Professional Member*

Membership No: M2443 **Verify:** <https://cssl.lk/membership/verify/M2443>
